6. ACCIDENTAL RELEASE MEASURES

Personal Precautions Avoid contact with the skin and the eyes. Ensure adequate ventilation. Take precautionary

measures against static discharges.

Environmental PrecautionsConsult a regulatory specialist to determine appropriate state or local reporting requirements,

for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinenet environmental permits.. Do not flush into surface water or

sanitary sewer system. Do not allow material to contaminate ground water system.

Methods for Clean-up Sweep up and shovel into suitable containers for disposal. Reduce dust spreading with water

spray, collect rinsate..

7. HANDLING AND STORAGE

Handling Keep out of reach of children. Wear personal protective equipment. Avoid contact with skin and

eyes. Avoid dust formation. Avoid breathing dust. Ensure adequate ventilation. Wash thoroughly after handling. . Remove and wash contaminated clothing before re-use. Empty

containers may contain hazardous residues.

Storage Keep away from direct sunlight. Keep containers tightly closed in a cool, well-ventilated place.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines

Engineering Controls Investigate engineering techniques to reduce exposures. Local mechanical exhaust ventilation

is preferred. Consult ACGIH ventilation manual or NFPA Standard 91 for design of exhaust

systems. .

Personal Protective Equipment

Eye/face Protection

Use eye protection to avoid eye contact. . Where there is potential for eye contact have eye

flushing equipment available..

Skin Protection Chemical resistant protective clothing. Chemical resistant gloves. Long sleeved clothing. Long

pants. Socks and footwear.

Respiratory Protection Where airborne exposure is likely, use NIOSH approved respiratory protection equipment

appropriate to the material and/or its components. Full facepiece equipment is recommended and, if used, replaces need for face shield and/or chemical goggles. If exposures cannot be kept at a minimum with engineering controls, consult respirator manufacturer to determine appropriate type equipment for given application. Observe respirator use limitations specified by NIOSH or the manufacturer. For emergency and other conditions where there may be a potential for significant exposure, use an approved full face positive-pressure, self-contained breathing apparatus. Respiratory protection programs must comply with 29 CFR 1910.134.

Mixers & loaders:

A NIOSH approved dust mist filtering respirator with MSA/NIOSH approval number prefix TC-

21C or a NIOSH approved respirator with any N, R, P, or HE filter. .

General Hygiene Considerations
